PROFESSIONAL SUMMARY

Software engineer and U.S. Navy veteran who builds and ships customer-facing mobile and full-stack products. Hands-on experience spans application architecture, secure backend systems, data pipelines, subscriptions, deployment, and team leadership. Built GUNDEX to 3,000+ users and drove \$30,000 in TCGPlayer affiliate-attributed sales within three months; led a five-person development cycle for Clean Stream before taking sole ownership of the remaining application work.

TECHNICAL SKILLS

Languages: Dart, TypeScript, JavaScript, Java, Kotlin, Python, SQL, HTML/CSS, C, C++

Mobile & Web: Flutter, React, Node.js, Express, Tailwind CSS, REST APIs, responsive UI development

Backend & Data: Supabase, PostgreSQL, Prisma ORM, authentication, Row Level Security, Edge Functions, cloud storage, data pipelines

Platforms & Tools: Git, GitHub, Vercel, Firebase, RevenueCat, Android Studio, Xcode, IntelliJ IDEA, VS Code, OpenAI Codex, Grok

Engineering Practices: Object-oriented design, clean architecture, secure API design, CI/CD, Agile delivery, code review, testing strategy

EDUCATION

Bachelor of Science in Computer Science | Ball State University, Muncie, IN

May 2025

SOFTWARE ENGINEERING EXPERIENCE

Lead Software Engineer & Founder | GUNDEX LLC

May 2025 - Present

Remote

- Architected, built, and released a production Flutter/Dart collection-management application on the Apple App Store and Google Play, scaling organically to 3,000+ users.
- Designed the Supabase/PostgreSQL backend for user collections, card metadata, pricing, rarity data, subscription state, and historical value tracking; enforced secure per-user isolation with Row Level Security.
- Built automated ingestion workflows for card, set, rarity, and pricing datasets and implemented search, filtering, collection valuation, and longitudinal value insights.
- Integrated RevenueCat subscriptions and in-app purchases with entitlement management and feature gating; managed CI/CD, TestFlight/beta distribution, global releases, and store compliance.
- Converted collector feedback and usage patterns into iterative releases that improved product usability and drove \$30,000 in TCGPlayer affiliate-attributed sales within three months.

Founder & Software Engineer | Clean Stream Laundry Solutions

Jun 2024 - Present

Indiana | Hybrid

- Led a five-person development cycle modernizing a coin-operated laundromat into a software-enabled service, establishing architecture, code-review, testing, and production-readiness practices; now independently completing the remaining application work.
- Architected and continue developing a Flutter customer app for payments, machine interaction, laundry-status notifications, maintenance requests, rewards, account workflows, and location-based services.
- Build a React/TypeScript administrative portal and Supabase backend for employee management, machine and location operations, maintenance tracking, traffic analytics, and revenue reporting.
- Own vendor and integration planning with Nayax for unattended payments and Kisi for application-controlled keyless access, translating operational requirements into a phased technical roadmap.

SELECTED ENGINEERING PROJECTS

UI Web Builder - Principal Developer & Team Lead | React, TypeScript, Node.js, Express, Prisma, Supabase, Tailwind CSS, Vercel

- Led delivery of a drag-and-drop application for real-time customization of modular website components, coordinating feature planning, GitHub collaboration, task ownership, and clean-code standards.
- Implemented the full-stack architecture, persistence, authentication, and deployment workflow for a responsive, scalable web experience.
- Integrated Supabase-backed persistence and user authentication, then deployed the application through Vercel with a repeatable Git-based delivery workflow.

ACM Ethics App - Solo Developer | Kotlin, Android Jetpack | GitHub

- Built a mobile reference application around the ACM Code of Ethics with search-focused navigation and a maintainable Jetpack-based Android structure.
- Deployed a public project demonstration and maintained the source repository for review.

Spotify Search Engine - Principal Developer & Team Lead | Flutter, Dart, Spotify Web API, JSON, Git

- Led development of a mobile search interface supporting single and multi-query discovery across Spotify content while rapidly adopting Flutter and Dart.
- Implemented API integration, asynchronous JSON parsing, filtering, and presentation logic to surface relevant results in a unified user experience.

LEADERSHIP & TECHNOLOGY EXPERIENCE

Operations & Personnel Manager | United States Navy

Dec 2021 - Dec 2022

- Led ten supervisors supporting the processing, training, welfare, and performance tracking of 220+ personnel per month in a high-tempo environment.
- Replaced paper-based candidate workflows with structured digital tracking, improving data accuracy, accountability, and operational visibility while safeguarding personally identifiable information.
- Served as the primary liaison to the Center for Explosive Ordnance Disposal and Diving, coordinating requirements, resolving operational blockers, and maintaining stakeholder alignment.

Business Technology Analyst / Account Manager | Impact Networking

Sep 2019 - Dec 2020

- Translated executive stakeholders' operational needs into software, systems, and workflow recommendations; delivered technical demonstrations and supported implementation through the full client lifecycle.
- Managed discovery, solution design, proposals, ROI reporting, and post-implementation support across a consultative B2B technology portfolio.

National Account Executive | Action Technologies Group

Jan 2019 - May 2019

- Managed regional technology accounts and coordinated telecom solution implementation across customer, technical, and vendor stakeholders in Indiana, Illinois, and Michigan.
- Tracked account performance, forecasted quarterly outcomes, communicated implementation status, and escalated delivery risks across internal and external teams.

Solutions Specialist -> Solutions Manager / General Manager | Verizon Wireless

Aug 2014 - Jan 2019

- Promoted through progressively responsible roles leading sales, operations, coaching, staffing, inventory, compliance, reporting, and customer experience.
- Improved a store's Great Lakes Market ranking by 149 positions, lifted retail-operations rank by 45 positions, and increased additional sales by 149% while serving as General Manager.
- Created district-wide training and led regional performance calls; received Verizon's Fingerprint recognition for organizational impact and leadership.
- Developed sales tools, coaching plans, and operating routines that improved team capability, customer experience, and execution consistency.
